

Adena Power is pleased to announce the successful demonstration of a 1 kWh battery module. This demonstration is a key product readiness milestone for our new sodium-based battery technology. The test validates important ...

Adena Power General Information Description. Developer of energy storage equipment designed for commercial industries to reduce the use of fossil fuels. The company offers a low-cost, long-duration sodium-based energy system that generates carbon-free electricity, enabling organizations to get safe and sustainable electricity storage without sacrificing performance.

Adena Power Secures DOE Funding to Advance Sodium Battery for Wind Energy Integration; Adena Teams Up with Halliburton Labs to Accelerate Clean Energy Storage Solutions; Adena Power Charges Forward as New Energy Challenge Finalist! Archives. August 2024; July 2024; May 2024; April 2024; March 2024; February 2024; January 2024; December 2023 ...

Adena Power systems utilize 3 patented materials to produce a sodium-based battery cell that delivers clean, safe, and long-lasting energy storage. More than an alternative to lithium-ion, Adena's proprietary material science and end-to-end domestic supply chain enable a superior solution for grid-scale to small-scale applications.

Adena Power is an energy storage provider using U.S. raw materials and manufacturing to deliver sodium batteries to behind-the-meter C/I customers and utility markets. Understanding the market need for safer, lower installed cost, and flexible duration battery solutions, Adena provides C/I with the ability to maximize bill management and stack ...

CleanTechnia, the "World's Top Cleantech Site," recently published an article titled "Sodium Batteries Challenge Lithium-Ion On Cost, Supply Chain" by Tina Casey that highlighted Adena Power and our ability to commercialize sodium batteries. Given that CleanTechnia is an industry leader who has spent the last 15+ years inspiring people and helping them take cleantech ...

Adena Power recently contributed time, expertise and materials to a study just published in Energy Storage Materials that demonstrates the feasibility of a new design for a grid energy storage battery built with the low-cost metals sodium ...

Nexceris, a clean energy innovator with more than 25 years of focus on renewable energy, announces that it has been awarded a U.S. Department of Energy (DOE) Phase 2 small business innovation research (SBIR) contract to help modernize the U.S. energy grid in order to deliver clean, affordable electricity, and reduce power outages to homes across America.

Adena Power provides initial commercial/industrial customers with a differentiating energy storage solution that serves as a proof point for utilities. NaSICON Powder and Membrane Development. Energy Storage Product Development. Adena is commercializing a long-duration sodium battery energy storage system, that incorporates a low-cost iron and ...

Adena Power, a pioneer in sodium-based energy storage, is thrilled to announce a \$200,000 grant from the U.S. Department of Energy (DOE) Wind Energy Technologies Office (WETO) and Office of Electricity. This funding will accelerate the development of our sodium solid-state battery technology for seamless integration with wind energy systems.

Adena Power. Adena Power provides energy storage using U.S. raw materials and manufacturing to deliver sodium batteries at grid scale (Lewis Center, OH). adenapower . Arculus Solutions, Inc. BladeX Technologies. For ClimateTech. Administered by NextCorps and SecondMuse. Supported by NYSERDA.

Lewis Center, OHIO (February 19, 2024) - Adena Power is excited to recently secure an exclusive license to Pacific Northwest National Laboratory's (PNNL) sodium metal halide battery patents to allow for the use of iron instead of nickel. This enabling cathode technology complements Adena's planar cell architecture for a low-cost, high ...

This news comes on the heels of a banner year for Adena Power. We were recently recognized with the People's Choice Award at the National Renewable Energy Labs Industry Growth Forum, a testament to the potential of our sodium-based energy storage solutions. Additionally, we were awarded the MAKE IT Prize by the U.S. Department of Energy ...

Adena Power is working on new technologies to help build the electrification infrastructure that enables electric vehicle adoption. See the full article here (note you will need to have an account to view the full article.) What follows is the ...

Adena Power is working on new technologies to help build the electrification infrastructure that enables electric vehicle adoption. See the full article here (note you will need to have an account to view the full article.) What follows is the content of the article featuring Adena Power. Another ripple in this EV pond is Adena Power in Lewis ...

Ohio has a strong manufacturing culture, spirit, and existing infrastructure that will aid the clean energy transition for decades to come. As the U.S. continues to adopt energy onshoring policies, energy storage solutions that use both domestic raw materials and manufacturing are uniquely positioned for exponential growth.
