

Which agencies in Afghanistan are engaged in the energy sector?

Among the agencies in Afghanistan that are engaged in the energy sector, there are often overlaps and in some occasions contradictions in mandates, jurisdictions and scope of work, in particular with regard to MEW, DABS, MoMP and MRRD.

What is the institutional analysis and development framework for Afghanistan's electric power sector?

To analyze Afghanistan's electric power sector, this study employs Elinor Ostrom's Institutional Analysis and Development (IAD) framework. The IAD framework is considered to offer an excellent fit with which to examine this problem, which focuses on the institutional arrangements and interactions that affect the electricity sector.

How do rules-in-use work in Afghanistan's energy sector?

Patterns of interaction The rules-in-use, along with the institutional missions and organizational structures of the many participants in Afghanistan's energy sector, comprise a framework designed to govern the sector's operations.

Why is Afghanistan's energy sector unable to stand on its own?

This circumstance results from the lack of a unified development agenda for Afghanistan's energy sector and the fragmented nature of decision-making and project implementation. After fifteen years of sincere, robust effort, the energy sector remains unable to stand on its own.

Is there a power grid in Afghanistan?

Most rural areas in Afghanistan, accounting for 75 % of the population, are not connected to the grid. The power supply is limited to self-made solar PV rooftop systems, which cannot be used for productive use to support economic activities.

How to reform the electricity sector in Afghanistan?

Clarifying scope of work and forming a neutral regulatory body are key to reform. The electric power sector in Afghanistan suffers from numerous challenges. Roughly 70% of the population has no access to electricity, and 90% of those without electricity live in rural areas.
