

Who is GTI energy?

With a team that includes some of the nation's top energy scientists, engineers, and thought leaders, we are helping deliver clean and resilient solutions to a growing world. GTI Energy partners with organizations around the globe to operationalize the ambitious aspirations required for the global energy transition.

What is GTI Energy's Hydrogen Technology Center?

GTI Energy's Hydrogen Technology Center brings together top-tier subject matter experts, thought leadership, extensive labs and facilities, and the experience of decades of successful hydrogen projects. Our deep and unbiased energy industry knowledge and technical expertise enable us to develop clean energy solutions for integrated energy networks.

What is Algeria's Energy Transition Strategy?

One of the most ambitious elements of Algeria's energy transition strategy is the development of the SouthH2 Corridor, aimed at supplying Europe with green hydrogen.

Why should you join GTI energy?

GTI Energy partners with organizations around the globe to operationalize the ambitious aspirations required for the global energy transition. GTI Energy is inviting you to join us now as we seek to enable low-carbon, low-cost integrated energy systems that leverage gases, liquids, infrastructure, and efficiency.

How can Algeria improve regulatory efficiency?

Finally, improving regulatory efficiency by streamlining approval processes and reducing bureaucratic delays will foster a more favorable environment for investors, accelerating project timelines and enhancing Algeria's competitiveness in the global energy market. Algeria's future is bright, but the road ahead is complex.

Can Algeria become a leader in the emerging hydrogen economy?

Given Algeria's geographical proximity to Europe, coupled with its renewable energy potential, the country is well situated to become a leader in the emerging hydrogen economy. The agreement not only strengthens Algeria's ties to Europe but also underscores the potential for green hydrogen to become a pillar of its future economy.

SunGas Renewables (SGR), Inc. a spin-out of GTI Energy, is taking a leading role in decarbonization through providing its S1000 renewable syngas product to third parties for renewable hydrogen and biofuels production while also ...

In April 2021, GTI Energy launched a brand refresh to reflect our growing capabilities, expertise, and impact across energy system transitions. The name was updated from Gas Technology Institute to GTI Energy to more accurately represent the expansive reach of our work built on a legacy of natural gas research.

For CH4 Connection 2017, GTI Energy partnered with Colorado State University (CSU)'s Energy Institute to organize CH4 Connections 2017, which featured a tour of CSU's Methane Emissions Test and Evaluation Center (METEC) and drew a record number of attendees, sponsors, and exhibitors. A diverse group of keynote speakers and panelists focused ...

GTI Energy Renews Terms for Directors and Officers (11/18/2022) GTI Energy Once Again Recognized as One of 2022's Most Engaging Workplaces (11/08/2022) GTI Energy Names Sumeet Singh of PG& E as a New Board Member (05/05/2022) GTI Energy's President and CEO David Carroll Announces Retirement, Dr. Paula Gant to Assume Leadership Role ...

The 10-megawatt (MWe) Supercritical Transformational Electric Power (STEP) Demo pilot plant in San Antonio, Texas, has successfully completed phase 1 testing, demonstrating operability, efficiency, and commercial readiness of the ...

The 3rd annual "Women+ in Hydrogen" event to celebrate Women's History Month was held Tuesday, March 28th in Washington, DC. Speakers included EPRI's Vice President of Energy Supply and Low-Carbon Resources Neva Espinoza, Elizabeth Kocs, Program Manager at GTI Energy's Hydrogen Technology Center, and Sunita Satyapal, Director of the U.S. DOE's ...

Texas governor Greg Abbott and the Public Utility Commission of Texas (PUCT) announced the release of the Texas Advanced Nuclear Reactor Working Group's final report on Texas' plan to build a world-leading advanced nuclear power industry to enhance electric reliability and energy security, promote economic development, and unleash new ...

GTI Energy is deeply involved in hydrogen research and development, with close collaborations already established in industry, research, and academia. GTI Energy has been conducting hydrogen technology research since the mid-1960s. HyRes will leverage GTI Energy's time-tested expertise in emissions research, reduction, and impact abatement.

On October 15, 2018, GTI Energy joined with Southwest Research Institute, GE Global Research, and the U.S. Department of Energy/National Energy Technology Laboratory (DOE/NETL) to celebrate the groundbreaking of the \$119 million first-of-its-kind 10MW Supercritical Transformational Electric Power (STEP) pilot plant known as STEP Demo. Find ...

Fireside Chat Moderator: Hon Xing Wong, Senior Manager, Programs at GTI Energy in the Zero Emissions Systems Team, GTI Energy; 3:40 - 3:45 PM: Wrap Up and Conference Adjourned. Ron Snedic, Senior Vice President, Corporate Development, GTI Energy; Bryan Willson, Executive Director, Energy Institute, Colorado State University; 4:00 - 5:30 PM

About GTI. GTI is a leading research, development, and training organization addressing global energy and

environmental challenges to enable a secure, reliable, abundant, and clean energy future. For nearly 80 years as an independent not-for-profit, GTI has been developing technology-based solutions that benefit industry, government, and consumers.

GTI Energy Benefits & Incentives Demonstrate Our Commitment to Your Welfare & Professional Growth. Beyond competitive salaries and outstanding benefits, GTI Energy offers a number of incentive plans that affirm the value of our highly talented staff. GTI Energy takes pride in our highly skilled and dedicated workforce.

The latest coming from GTI Energy's Hydrogen Technology Center. To address the many challenges and opportunities in our energy future, GTI Energy is launching a hydrogen technology center with world-class R& D capabilities to enable the hydrogen economy through low-carbon production, promoting use in industry and buildings, ensuring safe compatibility with the ...

GTI Energy is a technology development and training organization with a long-standing commitment to carbon management. With decades of collaboration experience with governments, academia, industry partners, and local communities, we develop reliable, efficient, affordable, low- and zero-carbon energy solutions that improve lives, economies, and the environment.

Effective implementation of a hydrogen economy will hinge on the development of large-scale, low-cost storage solutions. To ensure that storage is prioritized in the burgeoning hydrogen economy, GTI Energy has developed SUSTAIN H 2. This collaboration was designed to accelerate the deployment of safe and cost-effective long-term underground hydrogen storage ...
