Vanuatu: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Allset Energy designed a 99.9 kW premium rooftop solar system that optimised roof constraints and maximised the client's return on investment. Allset Energy's project management and onsite expertise allowed it to deploy the system in record time without impacting the whole-of-site renovations being completed at the time.
