A solar inverter is a device that converts the DC (Direct Current) electricity generated by solar panels into AC (Alternating Current), the type of electricity used in most homes and appliances. In short, it's what makes the solar power usable for your everyday needs. Types of Solar Inverters. Off-Grid Inverters: Designed for homes that are entirely disconnected from the national grid, ...

3. Hybrid Inverters. Hybrid inverters are string inverters that can connect a storage battery to the solar PV system so the system will still work in the event of a voltage drop. Thus, a single unit will connect the panels and the battery. Lately, hybrid model prices have started dropping, being just as affordable as classic inverters.

What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines the best characteristics from both grid-tie and off-grid solar systems. In other words, a hybrid solar system generates power in the same way as a common grid-tie solar system but uses special hybrid inverters and batteries to store energy for later use. For this reason, hybrid ...

Make sure you know both the total cost of the system and the price per watt of solar installed. The cost per watt makes it easier to compare prices between quotes and gives you a better idea of how fairly the system is priced. The average price of solar is about \$1.99 to \$2.99 per watt in Indiana, so anything in that range is a fair price.
