Nvidia optimus settings show "power saving" as active, but its quite certainly not the case. When I then switch to Performance mode, log out, log in, switch to power saving mode, log out and back it, it works again - the power consumption is back at ~6 W. btw: No tlp or any other power saving tools are installed

2 ???; Argentina holds vast potential for global markets, particularly in the agriculture, energy, and mining sectors. The country is rich in natural resources, making it a prime candidate for ...

Argentina runs on two different power outlet types: I and C. Type I is commonly found throughout places like Australia, New Zealand, and China, and features three prongs in a triangle shape. Sometimes, cables only have the upper two prongs, although they still function the ...
