

What does Centrica Energy Storage do?

A key element of the infrastructure area of the Centrica family, Centrica Energy Storage operates the Easington onshore gas processing terminal in East Yorkshire and restarted gas storage operations at the Rough facility in the Southern North Sea in 2022, with a view to bolstering the UK's energy security and helping to reduce consumer bills.

Who are Centrica Energy Storage Limited (CES+)?

Centrica Energy Storage Limited (CES+) are part of the infrastructure area of the Centrica family.

Who is Centrica Energy?

Centrica Energy is a renewable energy trading company operating out of eight offices across all time zones to move energy from source to use. Our mission is to drive the green transition while offering sustainable and predictable energy costs for energy producers, suppliers and offtakers. In short, we call ourselves energy movers by nature.

Centrica plc, through its British Gas Business division, today announced that it has acquired Energy and Building Management Solutions Limited for a cash consideration of up to £3.2 million. The business combines energy management and consulting services with the capability to design, install, maintain and repair building control systems.

Centrica Energy is the trading and optimisation arm of Centrica plc, operating out of eight offices across all time zones to move energy from source to use. We are a leading provider of energy management and optimisation services to business, in addition to managing commodity risk and providing wholesale market access for the Centrica group.

Centrica Energy is the trading and optimisation arm of Centrica plc, operating out of eight offices across all time zones to move energy from source to use. We are a leading provider of energy management and ...

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.

To unlock the £2bn investment in the facility, Centrica requires a cap and floor model for the asset, similar to the model used for other forms of long-duration energy storage. A recent report from Centrica and FTI suggested that Rough could save consumers £1bn a year by 2050 if converted to hydrogen storage.

Centrica's long-term aim is to turn the Rough gas field into the largest long duration energy storage facility in Europe, capable of storing both natural gas and hydrogen. The UK has diverse gas supplies with connections

with Norway and other European countries and a number of LNG import terminals.
