

Why do Armenians use solar energy?

The reason for this is that average solar radiation in Armenia is almost 1700 kWh/m<sup>2</sup> annually. One of the well-known utilization examples is the American University of Armenia (AUA) which uses it not only for electricity generation, but also for water heating. The Government of Armenia is promoting utilization of solar energy.

Does Armenia need a solar power plant?

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor. Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank.

How much solar energy does Armenia produce a year?

According to the Ministry of Energy Infrastructures and Natural Resources of Armenia, Armenia has an average of about 1720 kilowatt hour (kWh) solar energy flow per square meter of horizontal surface annually and has a potential of 1000 MW power production.

Who makes solar panels in Armenia?

Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel. In Solaron Company merged a team of highly qualified professionals with many years of experience in the business organization from scratch.

Are solar panels legal in Armenia?

Consumers are allowed to install solar panels with total power of up to 150 kW, and may sell any surplus to electricity distribution company Electric Networks of Armenia (ENA). In Armenia, solar thermal collectors, or water-heaters, are produced in standard sizes (1.38-4.12 square meters).

Where is Solaron available in Armenia?

Solaron's services are available throughout all regions of Armenia. Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel.

Shtigen Energy Systems is an EPC company founded in 2011 which holds the 40% of solar market and >60% of the EPC market in Armenia. Shtigen is the exclusive representative of Phono Solar and KSTAR in Armenia and other countries. The company is Armenia's No1 solar taxpayer. Shtigen is going to launch several 5MW PV plants next year.

2.2MW ArSun-1 & 2 PV project, the largest commercial solar power station in Armenia, set to reportedly

provide electricity supply in Hrazdan community were inaugurated by one EPC ...

Shtigen Energy Systems is an EPC company founded in 2011 which holds the 40% of solar market and >60% of the EPC market in Armenia. Shtigen is the exclusive representative of Phono Solar and KSTAR in Armenia ...

The plate with the symbolic model of solar system made of bronze was supposedly created in 12th-11th centuries BC, and was discovered in Sevan Basin. ... The Moon was considered the closest independent luminary to the Earth. Such an arrangement of geocentric system is also found in medieval Armenian manuscripts. According to astronomers ...
