

Aston University-based Supergen Bioenergy Hub is to receive £5 million to continue its exploration of the use of renewable energy. The hub is one of three across the UK which contribute to the government's engineering net zero priority to ensure the country benefits from clean energy research and innovation.

To increase the reliability of renewable energy production, the local environment variables have to be monitored closely, such as the chamber/nacelle temperature and humidity. In such harsh working conditions, acquiring auxiliary power for such sensor load can harm system reliability if the power is drawn directly from the supply or load lines.

AB - Some renewable energy sources have been used by humanity from the beginning of its existence, especially biomass, solar energy, wind energy, and hydraulic energy. We can find some examples for the traditional use of energy resources in sailing, in the windmills and watermills, or in the constructive dispositions of buildings to harness the ...

Critics say PetroCaribe suppressed the development of renewable energy, burdened these small nations with billions of dollars in debt - and spurred corruption. Venezuela oil industry is in turmoil. Venezuela's oil rigs, which had been producing nearly 3 million barrels of crude oil a day in 2014, produce now less than a million barrels a day.

Tidal energy is highly predictable (unlike wind energy), is available night and day (unlike solar energy) and does not require expensive and environmentally damaging infrastructure (unlike hydroelectric energy). This paper examines tidal energy ...

The move to renewable energy production on-site will help Aston Marina, near Stone, cut its carbon footprint, Stafford Borough Council's planning committee heard on Tuesday (December 10). Committee members voted unanimously in favour of the proposals after visiting the area where the 724 solar panels are set to be installed.

TL;DR: In this paper, the authors evaluate the relationship among energy and sustainability, the renewable potential existing in Venezuela, as well as some new data and key insights regarding its energy framework, and make an attempt to identify the origin of the Venezuelan energy crisis, unexplainable in a country which two decades ago was an ...

Over the past 28 years, the average share of renewable energy consumption in Venezuela, expressed as a percentage of total final energy consumption, has been approximately 15%. The highest value recorded during this period was 16.64% in 2007. The renewable energy market in Venezuela is projected to grow at a compound annual growth rate of over ...

This importance is especially recognized for renewable energy, with growing attention to the benefits that it can offer to provide "Sustainable Energy for All" goals, poverty reduction, growth and in general sustainable development. ... In 2013 it consumed 13% of the global energy demand. Venezuela was one of the countries with higher ...

We introduce the BDA dynamics and explore the associated applications in renewable energy sector with a focus on data-driven innovation. Our study draws on the exponential growth of renewable energy initiatives over the last decades and on the paucity of literature to illustrate the use of BDA in the energy industry.

Professor Patricia Thornley is director of Aston University's Energy and Bioproducts Research Institute (EBRI), which was founded to explore sustainable resources to deliver an affordable, resilient and low-carbon energy future. She said: "Through this project, Aston University reaffirms its commitment to leadership in renewable energy ...

promoting renewable energy, and prioritizes the use of renewable energy in isolated systems. In 2013, Venezuela began the process to develop the Law for the Use of Alternative Energy. It also developed a draft Plan for the long-term development of renewable energy in ...

Meeting the rising energy demand and limiting its environmental impact are the two intertwined issues faced in the 21st century. Governments in different countries have been engaged in developing regulations and related policies to encourage environment friendly renewable energy generation along with conservation strategies and technological innovations.

sustainability Review A Critical Review of Sustainable Energy Policies for the Promotion of Renewable Energy Sources Yuehong Lu 1,* , Zafar A. Khan 2,* , Manuel S. Alvarez-Alvarado 3, Yang Zhang 1, Zhijia Huang 1 and Muhammad Imran 4 1 Department of Civil Engineering and Architecture, Anhui University of Technology, Ma'anshan 243002, China; zhya-8214@163 ...

The share of renewable sources in the primary energy supply in Venezuela has been on a mostly downward trend throughout the past decade. ... Renewable energy target in Africa 2020-2030, by country;

From renewable energy projects to sustainable infrastructure development, studying Sustainable Engineering opens doors to a wide array of rewarding career opportunities where you can make a tangible impact. ... Aston University boasts state-of-the-art facilities and laboratories equipped with the latest technology. Whether you're conducting ...
