How fast is battery storage deployment in France?

Battery storage deployment has not been as fast in France, or indeed much of mainland Europe, as it has been in markets like the US, UK and latterly Australia. RTE is conducting a pilot project, called Project RINGO, which will see just under 100MWh of battery storage deployed across three French sites that act as virtual transmission assets.

Is AFRR the future of battery storage in France?

France also shares common frequency regulation markets with much of Europe and some of these, notably the newly-introduced automated Frequency Restoration Reserve (aFRR), are being seen as important revenue streams that could be stacked to further the business case for battery storage in the continent.

Where is Saft battery storage located?
