

Namibia's green energy goal Namibia has a small population of 2.4 million people and a low electrification rate of 56%. It can generate only 40% of its own electricity and relies on imports, mainly from South Africa. The government wants to boost its power capacity to 1,677 MW by 2035, with 60% coming from renewables.

The maritime industry is another transportation sector undergoing rapid change in how operations are powered. Our focus on marine vessel electrification leverages our expertise in BESS, integrating modular battery power supplies designed specifically for the harsh marine operating environment and compatible with both high- and low-voltage AC and DC power systems.

Welcome to Ash Battery Systems! The DC Power Installation Professionals from Ash Battery Systems have served the Telecom, UPS, Data Center, Utility and Industrial markets in the Midwestern United States since 1954. To ensure the ...

Battery Systems entered the battery business in 1955 when the founder, Harry Streeleman, nicknamed Deadcell Harry, started a small battery rebuilding and recycling business in Southern California. His nickname came from his business: picking up dead tar-top batteries from local auto dealerships, removing the tar, replacing the bad cells and ...

SummaryLocationOverviewDevelopersSee alsoExternal linksThe Erongo Battery Energy Storage System, also Erongo BESS, is a planned 58 MW (78,000 hp) battery energy storage system installation in Namibia. The BESS, the first of its kind in the country and in the Southern African region, will be capable of providing 72MWh of clean energy to the Namibian grid.
