

Does Belize use solar power?

Belize uses solar power on a smaller scale, with the Government having installed solar micro-grids and solar-powered streetlights in rural communities not yet connected to the national grid. The Government of Belize, along with Belize Electricity Limited (BEL), intends to launch a pilot project introducing electric vehicles.

Will Belize Electricity compensate you for excess solar energy?

The hope is that through regulations, Belize Electricity Ltd will have to compensate you for excess solar energy flowing to the grid during the day and off-set it against the electricity you are drawing from the grid at night; however, the reality today is the opposite.

Can I build a house in Belize?

Be mindful that homes in Belize are built differently from the U.S. and require the approval of the Central Building Authority in the area you are planning to construct. If your intention is to construct your house, we suggest that you contact an architect to advise you. You can check the local yellow pages for a listing or you can search online.

Who installs the Orange Gallery Solar System?

We (The Orange Gallery) were the first official grid-tied system in Belize. Our system was installed by SESB and we have been powering our operations with free energy from the Sun for a few years now. We love it and are happy to recommend SESB!" Which solar system is right for me?

What does the Belize Chamber do?

Founded in 1920, the Chamber has been consistently championing the causes of its private sector constituency and considers among its primary objectives the social and economic development of Belize through the development of all sectors of industry, commerce and services.
