

What is the optimum renewables scenario for Bermuda?

According to The Bermuda Better Energy Plan, mid 2023 is a pivotal year for Bermuda's energy history as a 60MW offshore wind farm comes online, significantly reducing the island's use of fossil fuels in a single project.

Why is Bermuda so dependent on fossil fuels?

Historically like other modern developed countries around the world, Bermuda has depended on fossil fuel for energy production for electricity, heating, cooling and transportation.

What is Bermuda's national fuels policy?

The Government of Bermuda is creating a National Fuels Policy ('the Policy') to direct the fuels sector towards an affordable, sustainable, safe, and secure energy future, in line with international best practice.

How can you protect the environment in Bermuda?

Bermuda has a unique and complex ecosystem. To protect its biodiversity and its environment, learn how to correctly and legally import or export plants and animals, wood products, chemicals, and used vehicles and equipment. You can also find out where your energy comes from in Bermuda, and how to use it efficiently.

Does Bermuda have a plant protection laboratory?

Bermuda is a small island with big biodiversity. The Department of the Environment and Natural Resources looks after all of the island's plant life--sometimes even yours. See how the Plant Protection Laboratory can diagnose your sick or diseased plants.

Atlantis, a global leader in the tidal power sector, is pleased to announce the appointment of Simon Counsell as Chief Financial Officer. The Company has accepted the resignation of Duncan Black as Chief Financial Officer ("CFO"), who will step down on 18 September 2015, due to the intended relocation of the corporate headquarters, including the...

While the Company has implemented requirements within its articles to comply with the provisions of AIM Rule 17, the statutory disclosure of significant shareholdings is not identical to the requirements of the Disclosure and Transparency Guidance Rules for companies incorporated in Singapore and may not always ensure compliance with the requirements of AIM Rule 17. ...

The SAE hydro team is making excellent progress on the construction of the interlinked hydro projects, Loch

Etive and Glen Kinglass. With the sites nearing completion, we are aiming to commission the projects in the coming weeks. Once commissioned, the SAE Operations and Maintenance team will take over the day-to-day management of the schemes.

The Mey BESS project will see a 1200 MWh Battery Storage project delivered at a critical site for renewable energy projects. With huge expansion planned for onshore and offshore wind and our own tidal stream project, it is a perfect location for a battery storage project.

SAE projects will earn the majority of revenues from trading electricity, buying cheaply during periods of over-supply and selling at higher prices when the converse is true, and the balance of revenues from the Capacity Market and Ancillary Services.

As a developer of renewable energy projects, sustainability lies at the heart of the business. Across the Company's diversified portfolio of sustainable assets, the Group's employees have a passion for creating sustainable energy solutions and minimising their impact on the environment.

SAE Renewables is a global developer, owner and operator of sustainable energy projects and as a result is proud to have received the London Stock Exchange's Green Economy Mark. SAE owns the world's flagship tidal stream project, MeyGen. SAE is also the owner of the Uskmouth Power Station site that is being repurposed into a sustainable energy ...

Duncan is currently engaged in the asset management of renewable energy power projects in Asia for a leading impact fund manager. Duncan has a BEng (Hons) in Civil Engineering and a PhD in Fluid Dynamics, each from Imperial College, London. Graham Reid - CEO. ... Prior to joining SAE, Graham was CEO of RES Americas, and prior to that CEO of ...

SAE is proud to own the largest consented tidal stream project in the world, MeyGen. SAE has developed the 398MW MeyGen site since its acquisition in 2010. The site is already delivering predictable, renewable power and SAE is focused on delivering its full capacity, to help unlock this critical technology.

The securities of SAE are traded on the AIM market operated by the London Stock Exchange plc and its shares have not been admitted, nor have any applications been made, for any of its shares to be admitted or traded on any other exchanges or trading platforms. There are no restrictions on the transfer of shares in SAE. Applicable Takeover Code
