Solar is perhaps the best option for green energy as long as you have a south facing roof or spare land to place ground mounted panels. ... Hybrid off-grid systems use a combination of solar ...

It is the most user friendly solar I have ever seen. I love it. Don't buy the junk off Amazon. Those little solar generators only offering 700 watts won't help you with running an a/c. For those saying you have to shell out big bucks like \$15,000 upward for a solar system that can run a 5000 BTU a/c, that's not the case anymore.

How many solar panels does it take to run a house off grid? An average size off grid solar system in the US is 5 kW, which means you would need 20 solar panels at 250 W each, or 50 smaller 100 W panels. Whether this would run your house depends on how much sun you get and how much power you use. What is needed for an off grid solar system
