

What is the potential of wind power in Bhutan?

Wind Energy Bhutan has substantial capacity for leveraging wind power systems. The restricted theoretical development potential for wind power in the country is estimated to be approximately 761 MW, with Wangdue Phodrang exhibiting the highest potential at 141.7 MW, followed by Chhukha at 91.8 MW (DRE, 2015).

Why is energy important in Bhutan?

Energy in Bhutan has been a primary focus of development in the kingdom under its Five-Year Plans. In cooperation with India, Bhutan has undertaken several hydroelectric projects whose output is traded between the countries.

Is Bhutan able to harness its hydropower?

However so far, Bhutan has been able to harness only 1.6% of its total capacity. Bhutan is working in close cooperation with its neighbouring country India to harness its hydropower. Bhutan relies heavily on hydropower. Yet the country could diversify its energy mix with other renewable energy technologies (solar, wind and modern bioenergy).

What is Bhutan's energy supply?

Bhutan's energy supply primarily relies on electricity, fuel-wood, coal, and diesel. Electricity is the largest contributor, with a shift towards increased usage over the years. Fuel-wood usage has decreased, while bio-gas, solar energy, and limited-scale wind energy have gained traction as alternative sources.

Does Bhutan diversify its renewables with wind turbines?

Thimphu, Bhutan: Department of Renewable Energy, Ministry of Economic Affairs. 2016. ISBN 978-99936-703-2-2. ^a b Gyelmo, Dawa (2016-02-16). "Bhutan diversifies its renewables with wind turbines";

What are the four ministries of energy in Bhutan?

In Bhutan, the planning and coordination of energy-related activities primarily fall under the purview of four ministries: the Ministry of Energy and Natural Resources (MoENR); the Ministry of Agriculture and Livestock (MoAL); the Ministry of Industry, Commerce, and Employment (MoICE); and the Ministry of Infrastructure and Transport (MoIT).
