BIPV refers to the integration of photovoltaic systems directly into the architecture of buildings, such as walls, roofs, windows, or balconies. Unlike traditional solar panels that are added to a building, BIPV is designed as part of the building's structure, offering both functionality and aesthetic value. The photovoltaic modules generate electricity, reducing energy consumption ...

SUNFLARE. ABOUT SUNFLARE SUNFLARE is a company that successfully mass-produce light, thin, flexible, and durable CIGS solar panels. These revolutionary panels can seamlessly and easily integrate into existing commercial roof structures, new architecture and many manufactured products that need power without adding weight or interrupting the aerodynamics or design lines.

Luis has more than 20 distinctions in the fields of engineering, renewable energy, and physics; granted by institutions in the USA, Europe, and Latin America. He has developed and published scientific models and technical regulations in BIPV. He is also investigating the design of more economical and efficient solar cells for BIPV.
