

The OpenECU(TM) M450 is a rapid control prototyping embedded controller for Battery Management System (BMS). Provides control of the battery pack contactors and monitoring of the pack voltages and current; Supports isoSPI cell monitoring unit (CMU) slaves selected by customer to provide a complete battery management solution

A BMS battery management system is a powerful and effective tool that can help solar system owners understand how their battery bank operates. It can also help make sound financial decisions while improving a battery pack's safety, longevity, and reliability. The result is that owners of a BMS for lithium batteries get the most out of their ...
