

Renewvia Energy Corporation is a top 500 Global Solar Developer headquartered in Atlanta, Ga. We design, install, own and operate commercial and community solar power systems and provide a complete range of solar energy solutions ...

With the addition of Renewvia's minigrids into communities throughout Kenya and Nigeria, citizens not only have access to clean and reliable power, but electricity allows business days to be longer and greater opportunities for work. This access and growth of opportunity within the community enables a household to increase their monthly income.

Renewvia's strong track record can be measured in several ways. In Africa, we have grown from operating two minigrids in 2018 to four in 2019 and over 20 in 2021, growing our customer base from 164 in 2018 to 10,000+ today.
