The cornerstone of SWP's security is its Class III UL rated vault. In the world of high-security storage, a Class III rating signifies a facility's ability to withstand sophisticated penetration attempts, offering one of the highest levels of security available today.. The vault is designed to resist a range of threats, from physical break-in attempts to fire hazards.

By Howard Rhodes SEP 11, 2023 The Ministry of Sustainability has emphasized that renewable energy is the way forward for the Cayman Islands. The draft revised National Energy Policy (NEP) sets a target of achieving 100% renewable energy by 2050. However, despite this goal, the local power supplier, Caribbean Utilities Company (CUC), is investing in ...

Wärtilä will supply two 10MW/10MWh battery energy storage systems to a utility in the Cayman Islands. The Finland-headquartered technology company will provide the BESS units under an engineering, procurement and ...

for the Cayman Islands, this policy update includes new policies for energy resiliency to protect against storms, electric vehicles and energy storage, all of which support greenhouse gas emission reductions.
