In the Central African Republic, only 700,000 people of its 4.9 million people have access to electricity and about 60 percent of the country's population live in rural areas. Electricity access to the national power grid is limited and unpredictable. This lack of electricity access has made the country vulnerable during the COVID19 pandemic. A [...]

The Central African contributes only 0.002 % of global carbon emissions . Even though CAR's contribution to global greenhouse gas emissions is relatively small, emissions from agriculture, land use change and forestry, and energy, combined with strong emission growth from economic development, are increasing [3].. To estimate the sources of emissions, the inventory of ...
