The Republic of Congo's energy supply is highly dependent on gas (350 MW), hydropower (209 MW), and diesel (41 MW). The country aims to increase its power generation capacity to meet demand, and recently invested in the 120 MW Imboulou hydropower plant, a 30 MW thermal power plant, as well as two 300 MW turbine gas power plants. Due to the deterioration of ...

But at its 1990 conference, the PCT abandoned this ideology. The 1979 constitution recognized the PCT as the sole party: all other political parties and any political activity outside the PCT were illegal. In the National Assembly elections of 8 July 1979, all candidates were PCT members.

Republic of the Congo, positioned in Central Africa, has a varied geography from wet lowlands to mountainous terrain. This uneven distribution poses a challenge to the implementation of technology and telecommunications infrastructure. Despite this, the country is making strides in these sectors, with its urban populations, particularly in Brazzaville and Pointe Noire, ...

The Republic of Congo gained independence from French Equatorial Africa in 1960. It was a one-party Marxist-Leninist state from 1969 to 1991. Multi-party elections have been held since 1992, although a democratically elected government was ousted in the 1997 civil war and President Denis Sassou Nguesso has ruled for 26 of the past 36 years. The political stability and ...
