

Will Costa Rica continue to develop its power capacity?

Costa Rica's current plans for the continuing development of its power capacities would maintain a share of over 90% renewable electricity. Under these plans, the system might not be able to supply the transport sector with the additional power demand in case of a shift to electric mobility.

Can Costa Rica achieve a fully decarbonised energy system?

This policy roadmap complements the study "100% Renewable Energy for Costa Rica - A decarbonisation roadmap" by the University of Technology Sydney - Institute for Sustainable Futures. It aims to provide policy pathways for Costa Rican to achieve a fully decarbonised energy system in Costa Rica.

Does Costa Rica need a strong energy infrastructure?

As a smaller nation with a population of only 5 million and no major industry, the need for strong energy infrastructure is less than for larger countries of higher population density. While Costa Rica's largest source of energy is hydroelectricity, other sources include geothermal energy, biomass, solar power, and wind power.

What will Costa Rica's future power supply look like?

Under the two Renewables Scenarios developed as part of the UTS Study, solar photovoltaic (PV) and (onshore) wind power are expected to be the main pillars of the future power supply. Costa Rica's capacity for utility-scale solar PV is 200 GW.

How much energy does Costa Rica use?

Renewable energy in Costa Rica supplied about 98.1% of the electrical energy output for the entire nation and imported 807000 MWh of electricity (covering 8% of its annual consumption needs) in 2016. Fossil fuel energy consumption (% of total energy) in Costa Rica was 49.48 as of 2014, with demand for oil increasing in recent years.

How does Costa Rica produce electricity?

Costa Rica was one of the first countries in the world to produce its electricity from 100% renewable sources. Two thirds of the energy generated by their national electricity supplier, Instituto Costarricense de Electricidad (ICE), comes from hydropower.
