

Who provides electricity in France?

The vast majority of electricity in France is supplied by the state-owned EDF (Electricit  de France), although there are now also several other electricity providers, and it is worth shopping around for the best deal (more about that in a moment). First, let's get into the basics of setting up and connecting electricity at your French home.

Do you need electricity if you buy a house in France?

When you buy a home in France - it's likely to have an electricity supply already. Of course it might not, there are plenty of ancient properties that expats love to do up and they might need a supply laid on. And new builds will also need a new supply. But, let's just assume, you've bought a house and it's got electricity.

What is the standard electricity supply in France?

The standard domestic electricity supply in France is single phase 230 volts, 50Hz. It is also common to find a 3-phase 380v distributed supply in larger properties. The electricity supply authority EDF (Electricite de France) will provide a meter, fuses and a main current operated circuit breaker (disjoncteur diff rentiel).

How does electricity work in France?

The electricity supply in France is delivered to homes at 380/440 volts through three separate phases (not one as in some countries), which is then shared across the three phases at 220/240 volts with a frequency of 50 Hertz (cycles). Some appliances, such as large immersion heaters and cookers, draw power from all three phases.

Where can I buy electricity in France?

France opened its electricity market in 2007, and while state-owned EDF (Electricit  de France) remains the largest supplier of electricity in France, households in France can open an account with the supplier of their choice. EDF have an English language page on their website and an English language helpline.

How do I move into a new house in France?

Whether you've just signed the Acte de Vente on your French property or are renting an apartment, one of the first steps when moving into your new home will be to set up your electricity. When moving into a new house, you should contact EDF or your chosen electricity provider at the earliest opportunity (or a minimum of two days prior to moving).

This short video might be of interest to those people who have had problems with their mains electricity supply. I installed a 6kw diesel backup generator with an ATS (Automatic Transfer Switch) switch. If you want further details get in contact and I will try to help.
