

Why did Eritreans need solar energy?

Mr. Aklilu added that renewable energy, especially solar energy, was back then a novel technology to Eritreans, and, therefore, they had to learn how to install big solar energy plants to generate sufficient power to supply energy to many villages and farms.

Does Eritrea have a solar farm?

Eritrea is lagging far behind in the electrification of its territory and is now turning to renewable energy. The government has launched the country's first solar farm, a 30-MW facility 30 km from the capital, Asmara.

How much energy does Eritrea use?

Energy in Eritrea is an industry lacking in natural resources, though it has plenty of potential. Eritrea's final consumption of electricity is 33 kilotonne of oil equivalent (ktoe). In 2019, some off-the-grid community systems rely on a combination of solar power, diesel generators and grid batteries.

Can Eritrea lead the way to a sustainable future?

The world is at the tipping point for bolder steps and immediate aggressive actions. Eritrea, a country with negligible emission contribution, can potentially lead the way to secure a safe and sustainable future by taking a different path from previous development trajectories.

Why is energy transition important in Eritrea?

Consequently, Eritrea's energy transition should be informed by multidimensional pathways that respond to diverse realities and are critical to sustaining implementation and adaptability. The world is at the tipping point for bolder steps and immediate aggressive actions.

How is electricity generated in Eritrea?

Eritrea's NDCs were developed in 2018. The majority of electricity generated in the country is from imported fossil fuels. In 2019, the electrification rate in rural areas of Eritrea was only 37%, compared to 76% in urban areas. Some projects financed by international donors are aimed at increasing these rates.
