

What does eurobat mean for the battery sector?

EUROBAT calls for ambitious and sustainable measures in the new Batteries Regulation (2020/353) to boost the European battery sector. You will find here below a number of assets and publications, produced by EUROBAT, aimed at promoting a coherent, sustainable and supportive legislative framework for batteries in Europe.

What does eurobat stand for?

EUROBAT, along with the European Portable Battery Association (EPBA) and Recharge, have released its latest guidance focusing on the definition of a battery and its implications within the framework of the EU Batteries Regulation (EU 1542/2023). 'When aligned companies lobby together, much can be accomplished.'

What are the key highlights of eurobat?

Key highlights include: At EUROBAT we, along with the European Portable Battery Association (EPBA) and Recharge, have launched a Guidance. With this document, the European battery industry provides guidance on the identification of battery types and their recycling paths.

Should automotive batteries be recycled in the EU?

These batteries are already collected and recycled in the EU: Automotive batteries are lead-based. These batteries have a positive value at the end of their life, and all economic actors have a direct economic interest in recycling them.

What is eurobat & why is it important?

EUROBAT will emphasise the critical role of batteries in achieving the EU's decarbonisation goals and advancing the objectives of the Green Deal. Additionally, it will be presented the key policy asks and recommendations for the next five years. Pau Sanchis, Senior Policy Manager, said:

Does eurobat support a grouped target?

EUROBAT, therefore, supports a "grouped" target for all active materials together instead of individual targets. The objection that this might result in economically less valuable materials not being recycled could be addressed by including a weighting system in the calculation to give more relevance to specific metals. 7.

EUROBAT, along with the European Portable Battery Association (EPBA) and Recharge, have released its latest guidance focusing on the definition of a battery and its implications within the framework of the EU Batteries Regulation (EU 1542/2023). Understanding which objects meet the battery definition is essential for ensuring compliance with the Batteries ...

The EUROBAT Forum is the annual event of our association, where we host more than 100 key stakeholders, including senior executives from the battery industry, policy-makers, NGO representatives and other

stakeholders. In 2023, the two-day event will take place in Madrid. Venue: hotel Melia Princesa. 6 June (members only) - EUROBAT Cluster Session

EUROBAT discusses the importance of continued battery innovation and outlines potential areas to be addressed by battery research and development. Eurobat is the association of Automotive and Industrial Battery Manufacturers and their subcontractors in Europe, the Middle East, and Africa. Representing the European battery industry, EUROBAT ...

In 2020, the industry associations for batteries and battery-powered products RECHARGE, EPBA, EUROBAT, PRBA, EBRA, ACEA, LEVA-EU and MDBTC announced the launch of a new information platform for the safe transportation, testing and packaging of battery cells, batteries, and vehicles and equipment containing batteries.

business certainty for EU battery manufacturers, create new opportunities for all battery technologies and deliver jobs, growth and innovation in Europe. Define a coherent battery legislative framework Today, several pieces of legislation have batteries in their scope, creating legislative overlaps, ... battery. 1 IHS for EUROBAT, ILA, ACEA ...

Webinar: Battery Innovation Roadmap 2.0 Join us on 15 November to learn about the innovation potential of the latest battery technologies and how batteries will contribute to the achievement of the EU's ambitious decarbonisation agenda ...

EUROBAT will emphasise the critical role of batteries in achieving the EU's decarbonisation goals and advancing the objectives of the Green Deal. Additionally, it will be presented the key policy asks and ...

The Technical Annex of the Roadmap is specifically designed for the European R& D community, providing deeper technical insights into ongoing research and innovation efforts towards 2035 and beyond. The Technical Annex adopts a more market-oriented approach to highlight what is driving R& D to support further electrification in a various battery-powered end ...

We believe that Articles 6, 71 and 73 would be better amended to make reference to already existing REACH restriction processes rather than to create additional battery specific requirements. EUROBAT urges that the new Batteries Regulation should not be a "test case" for a new approach breaking the existing horizontal hazardous substance ...

EUROBAT has launched an information and awareness campaign called ... to develop new battery solutions in areas of hybrid and electro-mobility as well as grid flexibility and renewable energy storage. ...

"The major challenges to address with battery R& D" EUROBAT is the association of Automotive and Industrial Battery Manufacturers and their subcontractors in Europe, the Middle East, and Africa. ... In this new context, EUROBAT initiated a "White Paper Batteries Innovation Roadmap 2030" in June 2020, which

was later updated in June ...

A 2020 study commissioned by EUROBAT to understand the ability of Europe's battery industry to cope with future demand linked to current and emerging battery applications concluded that: ... If the current and scheduled giga plants come online effectively the European Li-ion battery industry will have the capacity to serve growing ...

EUROBAT, the association of European automotive and industrial battery manufacturers, is pleased to announce that the association has joined the Global Battery Alliance (GBA). GBA is a public-private collaboration platform founded in 2017 at the World Economic Forum to help establish a sustainable battery value chain by 2030. It brings together leading ...

The French overseas territory of New Caledonia has hailed the switch-on of a 16MWp solar farm, with battery energy storage to be later attached, and another standalone 5MWh battery project,...

The association of European automotive and industrial battery manufacturers says a raw materials czar -- officially the "commissioner for strategic autonomy" -- should be appointed as a key member of the next ...

III. Hungarian Battery Day. The III.Hungarian Battery Day conference, a leading conference for the stakeholders of the battery industry of Central Eastern Europe will take place on 26 October 2023 in Hotel Marriott Budapest, Hungary.. Join the battery industry's largest regional meeting! The Hungarian Battery Day provides a unique platform for strengthening ...
