

How will the Fijian government shape the development of Fiji's energy sector?

In shaping the development of Fiji's energy sector, the Fijian Government will pursue strategies that seek to promote and maintain a level playing field within Fiji's energy market where possible.

What is Fiji's energy policy?

This Policy will ensure that Fiji's agricultural sector and local industries can benefit from a further source of sustainable, indigenously-sourced energy while minimising any potential impacts on the environment or national food security.

How does Fiji ensure long-term energy security?

The Fijian Government seeks to ensure Fiji's long-term energy security by increasing the availability of data and information required to support investments designed to increase the reliability and resilience of the national energy infrastructure.

Why is Fiji pursuing energy sustainability?

Fiji's pursuit of energy sustainability will contribute to improved economic prosperity and will support access to new technologies. This NEP supports both energy sustainability and energy security objectives through a specific focus on demand-side and supply-side energy efficiency improvements.

Why is Fiji's energy sector a long-term priority?

The resilient development and diversification of Fiji's energy sector is a long-term priority for the Fijian Government due in part to rising national energy demand, volatile oil prices, ageing energy infrastructure, and the intensifying impacts of climate change and disaster events on Fiji's infrastructure, environment, people, and economy.

How will Fiji support universal electricity access?

The Fijian Government will help support universal access to affordable electricity through a focus on policies and investments that create electricity access for the remaining 4.5% of the population that is without access to reliable sources of electricity via either on-grid or off-grid energy sources.

The Fiji Government through the Fiji Ministry of Public Works, Meteorological Services, and Transport launched the 2023 - 2030 National Energy Policy (NEP) at the Holiday Inn Hotel in Suva. In officiating the launch, the Minister for Agriculture and Waterways, Honorable Vatimi Rayalu said the document is crucial to shaping the nation's future.

While most of us are used to the idea of reliable constant electrical energy, the reality is that it can be one tenuous string. In many parts of the country, storms, deep freezes, snow, and other natural disasters can rapidly cut regional electricity for hours or even days. Furthermore, even if your business is located in a reasonably weather-stable area, there's ...

This is also used to advise the Energy Fiji Limited that the new contractor, who has signed below, agrees to assume all responsibility for any portion of the project that may have been installed by the original contractor.
