

How many batteries does a greenpack boat have?

The three GreenPack lithium-ion batteries at the bow provided the engine with sufficient energy for the 30-km-long route. The GreenPack batteries attracted a lot of interest from spectators and boat owners. Due to the modular approach, the GreenPack rechargeable battery is an ideal partner for electric mobility on the water or on land.

What is greenpack & how does it work?

The well thought-out GreenPack concept with rental batteries and change infrastructure solves the known disadvantages (short ranges, high purchase price of the battery, battery wear, ...) of permanently installed batteries in electric vehicles. This makes the switch from the combustion engine to the electric vehicle inexpensive and sensible.

Why should you choose a greenpack system?

Choose from our different motors and battery packs the system that suits you best. An intelligent automatic battery changer, energy-charged GreenPacks and a wide range of possible applications - that's the GreenPack system. The uncompromising safekeeping for your batteries, both for storage and transport.

What is a greenpack rechargeable battery?

Due to the modular approach, the GreenPack rechargeable battery is an ideal partner for electric mobility on the water or on land. GreenPack at the Mobilität e.V. (Federal Association for Solar Mobility - BSM), GreenPack will be exhibiting at a community stand.
