Enel Green Power is the company that deals with renewable energy from every perspective: from direct sales through PPA, to commitment at the forefront with its plants worldwide. Skip to content [{{ item.label }}](#) [{{ currentSearchSuggestions.title }}](#) seleziona la lingua ...

In 2022, Greenland's electricity consumption from low-carbon sources is quite impressive, with more than three-quarters of its electricity coming from hydropowered solutions. This reliance on hydropower accounts for nearly 77% of the total electricity used, indicating a significant commitment to clean, sustainable energy. Despite this strong inclination towards green energy, ...

Green Power was founded in 1988 by a group of dedicated Hong Kong volunteers who care about the local environment. Since then, we have remained committed to promoting environmental education as we believe that education is key to changing the way we think and behave.
