

Why did Uruguay change its energy policy?

This volatility strained Uruguay's economy, forcing then-President Tabaré Vázquez to import energy at premium prices due to increasing household energy demands. This challenge led to a revolutionary shift in Uruguay's energy policy under the guidance of physicist Ramón Mende Galain, who transformed the nation's energy grid.

Why did Uruguay start using wind turbines?

Avoiding nuclear power entirely, Uruguay first embraced wind turbines as a source of cheap, reliable power; providing 40% of the country's capacity in less than a decade.

Does Uruguay have a problem with wind energy?

In other countries, there have been problems with quality, with accountability, with corruption. The wind project in Uruguay didn't suffer from those, but it does have some critics. In the last 12 years, the price for wind energy has gone down. It's now 30 to 40% cheaper than it was then.

How many hydroelectric plants are there in Uruguay?

Uruguay's hydroelectric generation capacity is 1,500 megawatts (MW) from four hydroelectric plants: Salto Grande (Salto), Palmar/Constitución (Rio Negro/Soriano), Rincón del Bonete (Tacuarembó/Durazno) and Baygorria (Rio Negro/Durazno).

Why did Uruguay turn to the Ute?

Instead, Uruguay turned to the UTE, empowering the entity to issue competitive bidding contracts to energy companies in the form of Purchase Power Agreements (PPAs) to attract direct investment- as well as international expertise in wind and solar technology.
