

How is energy consumed in Guam?

In Guam, the consumption of energy is heavily influenced by its remote location. Almost all energy is reliant on imports of petroleum products for use in transport and electricity. Guam does not have any domestic production of conventional fuels such as oil, natural gas, or coal.

What data is available on Guam's energy sector?

Introduction This report summarizes the currently available data on Guam's energy sector as of December 2023. It describes primary energy consumption, end uses, energy production, relevant policies, and key challenges, including details on the electric power and transportation sectors.

Why is Guam reliant on imported fuel?

With no indigenous fossil energy resources, Guam is reliant on imported fuel for their energy and transportation needs, with most of the imported fuel coming from Asia. The Guam Power Authority (GPA) is a public-power utility and autonomous agency of the government of Guam.

What is Guam's energy policy?

In 2019, P.L. 35-46 raised the RPS to 50% net electricity sales by December 31, 2035, and 100% by 2045. Regulations are described in Guam Code § 8311. GPA's Clean Energy Plan (2022 Integrated Resource Plan) roadmaps a path to 100% clean, reliable, resilient, affordable energy by 2045 and builds upon the 2008 IRP.

How does the US influence Guam's energy consumption?

The U.S. Navy and Air Force have significant land holdings and operations that impact both the economy and energy consumption of the island. As previously noted, the U.S. Navy alone is the island's largest energy consumer, representing 20% of electricity sales (The Bureau of Statistics and Plans Guam 2022).

What does the Guam Energy Office do?

The Guam Energy Office, as a line agency within the Executive Branch, implements energy programs for the benefit of the island community using grants awarded by the U.S. Department of Energy - the State Energy Program (SEP) and the Weatherization Assistance Program (WAP).

Practicing energy conservation and investing in energy efficiency play a major role to reduce O2 emissions from human activity and help combat climate change. The Guam Energy Office is committed to promote energy efficiency and provide conservation solutions, to assist with reducing fossil fuels dependency, to

partner

Guam has no crude oil reserves, petroleum production, or refineries. 24,25 The island's only port, located at Apra, receives all of the territory's imported petroleum products, which come primarily from Asia. 26,27 Motor gasoline typically accounts for about two-fifths of petroleum sales on the island. Sales of diesel fuel--used mostly to generate electricity--also ...

agencies and legislative officials to hear from the Guam Energy Office, Guam Power Authority, and Joint Region Marianas on the latest and upcoming energy projects on Guam. Finally. GEO held its annual Energy Expo where various public and private partners showcased their programs and products on energy technologies to reduce energy consumption.

The Guam Energy Office (GEO) is a gov-ernment agency within the Executive Branch of the Government of Guam. The Agency receives 100% federal funding from the U.S. Department of Energy to execute grant programs aimed at promoting renewable energy and energy efficiency. The ultimate goal is to reduce energy con-

Over the past 10 years, Guam's renewable energy production has grown to serve over 11% of it's power needs with more planned. AB - The island of Guam is located in the Pacific Ocean more than 6,000 miles west of the California coast. In the face of tropical storms, rising energy prices, and mandates for power plant retirement, Guam is ...

The island is endowed with sources of alternative energy. Guam's energy goal of reducing fossil fuel consumption 20% by the year 2020 encourages Guam to rise to the challenges created by volatile energy prices, increasingly scarce resources, vigorous world competition and technological innovation.

Guam is on the path to eliminating the use of fossil fuels, with a goal of achieving 50% renewable energy by 2035 and 100% by 2045, leaders of utilities said, describing their efforts during the ...

The Guam Energy Office is a small line agency within the Executive Branch of the Government of Guam. Established since 1974, the Guam Energy Office continues to exist by Executive Orders and with mostly federal dollars from U.S. Department of Energy to operate and implement grant activities including addressing local initiatives. With the ...

Page 3, Guam Energy Code 4.2.1 Insulation. Insulation materials shall be installed to achieve proper densities, main tain clearances, and maintain rated R-value of insulation. Exception: Insulation may be compressed at

the structural support for draped applications in metal buildings.

The pattern of energy production and use in Guam is shaped by its location, a remote island. Almost all energy is reliant on imports of petroleum products for use in transport and electricity. Guam has no domestic production of conventional fuels such as oil, natural gas or coal. Its economy is dependent on the import of gasoline and jet fuel for transport and residual fuel oil ...

The Guam Power Authority's Clean Energy Master Plan (CEMP) is a comprehensive plan for transitioning Guam from legacy fossil fuel fired generation to renewable energy and non-greenhouse gas emissions electric energy supply. The Clean Energy Master Plan is a living document and is continuously being updated.

N2 - This profile provides a snapshot of the energy landscape of Guam, an island territory of the United States located in the western Pacific Ocean. Like many island nations, Guam is highly dependent on imported fossil fuels - nearly all the island's electricity is generated using imported petroleum products. This leaves it vulnerable to ...

The cost of electricity on Guam has risen steadily over the last two years, largely due to global fuel costs. The Guam Bureau of Statistics and Plans recorded a 24.7% increase in energy costs between the first quarters of 2022 and 2023.. Fuel costs are expected to come down in coming months, which will lower the cost for electricity as well.

GUAM ENERGY OFFICE. Rebecca J. Respicio. Director. Address. 548 North Marine Corps Drive Tamuning, Guam 96913. Telephone (671) 646-4361 Fax (671) 649-1215. Hours of Operation Monday - Friday 8:00 AM - 5:00 PM Closed on Holidays and Weekends. QUESTIONS, COMMENTS, SUGGESTIONS. First Name. Last Name. Phone No. Email Address.
