

The Micro-Modular Reactor (MMR) is a two-megawatt microreactor that utilizes nuclear fission to generate electricity. Using low-enriched uranium as its fuel source, the power for each MMR is designed to last ten years, before it needs to be replaced. "Overall, MMR technology is compact, mobile, safe, and secure," notes Samuel. "One MMR unit can power two thousand ...

Hadron Energy is a culmination of more than 6 years of his research in materials science, nuclear engineering, and mechanical engineering. It has already surpassed the top 1% of startups in terms of its fundraising profile since being incorporated July 8th, 2024. The nuclear energy industry as a whole is poised to grow 300% due to government ...

Hadron Energy was thrilled to participate in Climate Week NYC. The team was able to engage in 13 large events with many meetings throughout the week.
