

Does Ethiopia have a hybrid energy system?

Ethiopia possesses an abundance of small-scale wind,solar,and hydropower resources that are suitable for electrifying rural areas 17,18. It is plausible that a hybrid energy system,by virtue of its enhanced dependability,provides superior energy service in comparison to any individual stand-alone supply system (e.g.,solar,wind) 19.

How does energy access in Ethiopia affect public confidence?

These challenges hugely affect the market diffusion, sustainability of the systems, and the public confidence on the technologies. The current energy access in Ethiopia stands at 44% access rate, where 33% of access is provided through grid connections and 11% through off grid solutions .

Does Ethiopia have a big electricity gap?

Ethiopia also has a large gap in electricity access between urban and rural areas and the discrepancy is such that in large towns,95% of people have electricity (83% in small towns) but dropping sharply to under 10% in rural areas.
