

How has Lithuania improved its energy security?

The electricity connections with Poland and Sweden, the ongoing synchronization project, the FRSU, as well as development of oil and gas infrastructures significantly improved Lithuania's energy security by creating access to international markets, eliminating decades of monopoly in the energy sector and making Lithuania self-sufficient.

How ambitious is Lithuania's energy transformation?

The current energy transformation is very ambitious. Lithuania has almost fulfilled its key energy security and diversification targets during the last decade and is aiming for the EU energy agenda priorities: moving fast RES, CO₂ reduction, energy efficiency and promoting green energy and innovations.

What is Lithuania's national energy strategy?

The National Energy Strategy reflects a more mature approach to energy security and contributes to Lithuania's transition to a low carbon and sustainable energy supply following the EU and global energy and climate objectives. However, the practical implementation of the energy transition is crucial.

What is Lithuania's Energy Independence strategy?

A new National Energy Independence Strategy (2018) closely follows the EU goals of energy and climate policy. For almost two decades after 1990 the main priority of Lithuania's energy policy was to increase energy security.

What was the main priority of Lithuania's energy policy after 1990?

For almost two decades after 1990 the main priority of Lithuania's energy policy was to increase energy security. The diversification of the energy supply (oil and gas mainly) and construction of infrastructure for alternative importing capabilities was the main priority.

What is Lithuanian energy transition?

Lithuanian energy transition aims to create a brand-new energy system when compared to the previous type. The Lithuanian energy sector formed during the Soviet era was deeply integrated into the energy system of the whole Soviet Union, and there was no need to think about energy diversification, security or efficiency.
