

What are the economic incentives in Puerto Rico?

The main economic incentives for solar energy in Puerto Rico include a 4% fixed income tax rate for 15 years. Additionally, "bona fide farmers" are exempted from paying all types of excises for equipment, articles and objects whose operation depends solely on solar energy, excluding power produced by petroleum and its derivatives.

When did Puerto Rico update its building energy codes?

Puerto Rico updated its building energy codes in 2009. The Governor of Puerto Rico provided assurance that Puerto Rico would update its building energy codes as part of the state's application for State Energy Program funds from the American Recovery and Reinvestment Act (ARRA).

What is the Green Energy Fund in Puerto Rico?

The Green Energy Fund (GEF) was created by Act 83 as a dedicated fund held separately from general funds to support renewable energy development in Puerto Rico. This is significant since 70% of the island's electricity comes from oil, according to the government of Puerto Rico.

What is the Puerto Rican energy affairs administration (EAA)?

The Puerto Rican Energy Affairs Administration (EAA) is the body assigned by the Governor with the responsibility to implement building energy codes for residential buildings that meet or exceed the International Energy Conservation Code (IECC 2009).

Does Puerto Rico have a property tax exemption?

Puerto Rico provides a property tax exemption for solar powered material, equipment or accessory and renewable energy collection, storage, generation, distribution, and application equipment.

What grants are available for photovoltaic projects in Puerto Rico?

Up to 50% of installed costs are available for photovoltaic (PV) and wind projects in Puerto Rico through Tier II competitive grants. These grants are for projects over 100 kilowatts (kW) and up to and including one megawatt (MW). Projects that request less may also be considered, but priority is given to those requesting the maximum grant amount.
