

North Macedonia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Filled with optimism and with clear aims we are looking forward to new challenges and projects through which the Group and Infinity Energy and ITSS will set new business standards in the North Macedonian and regional markets.
