

What is the future of electricity supply in Iraq?

There are a number of pathways available for the future of electricity supply in Iraq but the most affordable, reliable and sustainable path requires cutting network losses by half at least, strengthening regional interconnections, putting captured gas to use in efficient power plants, and increasing the share of renewables in the mix.

Does Iraq have a good power sector?

As a major producer, Iraq's electricity sector is almost entirely dependent on fossil fuels, which account for more than 80% of power generation. Despite its vast energy resources, the performance of the country's power sector is sub-optimal.

What percentage of Iraq's electricity comes from natural gas?

Nearly all (about 98%) of Iraq's electricity generation is from oil and natural gas.⁶² Natural gas use in the electric power sector increased after 2016 because Iraq began importing natural gas from Iran to increase its own supplies. Hydroelectricity accounts for most of the remaining share of electricity production.⁶³

Why is Iraq's energy system vulnerable?

However the capacity to capture and process this gas has not kept pace. The inability to utilise its gas riches means that the country's gas deficit has grown, and Iraq now relies on imports from Iran to meet increasing demand. This has introduced a number of vulnerabilities to Iraq's energy system.

How does Iraq's power sector perform?

Despite its vast energy resources, the performance of the country's power sector is sub-optimal. Iraq's power sector suffers from a double whammy: unsustainable growth in power demand, coupled with under-investment and a lack of reforms in generation, transmission, and distribution. The result is a growing mismatch between power supply and demand.

How much oil does Iraq produce a day?

It also takes a detailed look at the country's oil and gas sector, projecting that Iraq's oil production will grow by 1.3 million barrels a day by 2030, becoming the world's fourth-largest oil producer behind the United States, Saudi Arabia and Russia.

Iraq Energy Institute Announces 6th Iraq Energy Forum on 18-20 June.... 10/05/2022 Held in cooperation with the Iraqi government represented by key energy and economic ministries, and with the...

This has introduced a number of vulnerabilities to Iraq's energy system. For example, payment issues last summer led to Iran cutting exports, significantly exacerbating electricity shortages in Iraq during peak seasonal demand.

Capturing flared gas is vital for Iraq's energy independence plans. Despite progress in natural gas production from both non-associated gas and capturing associated gas, Iraq remains the second-largest gas flaring country in the world. "It would be a major achievement if Iraq's plans to increase gas production materialise by the projected ...

Iraq is seeking to raise the share of clean energy to 33% by 2030, helped by a solid expansion in the country's solar capacity, oil minister Ihsan Abdul Jabbar Ismail said at the Saudi Green Initiative Forum earlier this week.
