

Does Iraq have solar power?

And UAE-based developer Masdar signed an agreement with Iraq's government in June to build a 2 GW solar project. According to the International Renewable Energy Agency, Iraq has just 216 MW of installed PV capacity, despite having huge solar potential. No additional solar power has been deployed in the country over the last three years.

Why is Iraq launching a solar energy project?

"The solar energy project contributes to increasing the production of electrical energy, to supply the system with clean renewable energy," the government added. "It is also one of the first pilot projects in Iraq, which is implemented for the first time." No more technical or financial details on the new scheme were released.

Who is QHC solar?

QHC SOLAR (Qimam himreen company) is a national company and was established to provide these solutions. With a global installed base on world wide relations, we believe that solar power is now a mainstream, viable technology of 'today' enabling the move towards a zero-emission power supply.

The joint effort between TotalEnergies and QatarEnergy aims to construct a solar power project that will significantly impact the energy landscape in Iraq. With the installation set to consist of as many as 2 million solar panels, the project will be implemented in phases starting in 2025 and concluding in 2027.

Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity. Additionally, the cost of electricity powered by solar energy is lower than that of oil- or gas-fired ...
