

Will the Isle of Man be short of baseload power?

Both UK and RoI are predicted to become short of baseload power over the next decade. Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export.

Should new businesses go 'off-grid'?

New businesses, which would require more electricity to operate than could be accommodated by the current network could be encouraged to go 'off-grid'; existing consumers, especially where retail units are grouped together and can 'share assets' looking to decarbonise could also adopt this approach.

'Off-grid' er en livsstil som har vært mest vanlig i land der man ikke stoler på offentlige tjenester, som f.eks i USA der strømløst er relativt vanlige. Nå har spørsmålet om selvforsyning blitt mer aktuelt i hele verden, ettersom bevisstheten rundt hvordan krig- og naturkatastrofer påvirker oss har økt.
