

Will Sao Tome & Principe get a 2 MW solar project?

The island nation of Sao Tome and Principe switched on the initial phase of its first 2 MW solar project in August. Construction of 1.4 MW of PV capacity is now underway at two airports, and developers plan to install a total of 1.7 MW by 2023.

Does Sao Tome & Principe have electricity?

The World Bank says Sao Tome and Principe has an electricity access rate of around 76%, with 92% of the total coming from imported diesel. The government has vowed to increase the proportion of renewable energy from 5% of the energy mix to 50% by 2030. This content is protected by copyright and may not be reused.

Where will solar power plants be installed in so Tom and Principe?

The company will collaborate with the public utility Power and Water Company (EMAE) to install solar power plants across the country. The first phase of the program will include the installation of solar PV plants at the São Tomé international airport, as well as on the island of Príncipe, with capacities of 1.1 MW and 300 kW, respectively.

When will a 300 kW power plant be installed in Sao Tome?

Cleanwatts told pv magazine that it started developing 1.1 MW at Sao Tome airport and 300 kWp at Principe airport in August. It expects to complete the arrays by the end of this year. Another 300 kWp will be installed next year at other communities in Sao Tome.

Is Emae dragging down the economy of so Tom and Principe?

The troubles afflicting utility EMAE are dragging down the economy of the island nation. The United Nations Development Program is seeking consultants to conduct feasibility studies for a 2 MW solar project and three mini hydropower plants ranging in size from 1.15-2 MW in São Tomé and Príncipe.

How long does it take to build a photovoltaic plant in so Tom and Principe?

The first phase of the project will see the installation of photovoltaic plants at the country's national airport in São Tomé, as well as on the island of Príncipe. Cleanwatts vice chairman and co-founder Basilio Simoes said the two airport projects would take less than three months (for the smaller plant) and up to two years to build.

Abreu noted that "the panels and other equipment have arrived in the Port of Ana Chaves in São
Tomé, following delays and uncertainties due to a shortage of maritime transport." According to World
Bank data, 76.6% of the population of São Tomé and Príncipe have access to electricity,
generated primarily through imported diesel (92%).

Furthermore, investing in solar technologies could take inspiration from Greece, where solar accounts for
almost a quarter of their electricity generation. Such transitions are crucial to align São Tomé &
Príncipe with global trends towards low-carbon futures, benefitting from reduced emissions and
enhanced energy security.
