

Hi, Thanks for your hard work in putting this all together! I have a 7 cell SP10S009-P7S-100A-100A-B-U and ill soon be moving to the 14 cell version Im getting the error: [1663945045183] ERROR (1524 on raspberrypi): Recieved invalid data...

It is the JBD-SP10S009 (100A 8s 24V). I didn't top balance, but I did leave the cells connected in paralell for over a month before assembly. I've since read in the Overkill manual that this doesn't do anything, but I've also been talking with a tech at 18650 and he seemed to think it should have brought them into a close enough balance that the replacement ...

Shenzhen Jiabaida Electronic Technology Co., Ltd. Class: D-Class - Public 5 / 26 3. APP User Guide 3.1 Operating Environment Android version 5.0 / IOS version 10.0 or above, it can be used on devices that support

I am using individual JBD-SP10S009 (100A 8s 24V) BMS, one for each pack. I have attached a screenshot of the JBD Application home page which shows the state of the cells in one of the completed 24-volt packs. This is after the first full charge and before I have completed top balancing. Does anybody know why the SOC would show 100% 26.78 volts ...

JBD- AP21S001 is a software protection board scheme specially designed for 6~21 strings of lithium battery packs. The product adopts architecture of front-end acquisition chip + MCU,and some parameters can be flexibly adjusted through the host computer according to customer needs.
 Basic Parameter cell specification :6~21s strings of iron lithium ...

jbdtool dumps from the jbd bms only so I included that info (which was part of the HWINFO struct returned) jbd (and other storage agents for solard director) only report the total capacity (in amp hours) of the storage device (and does not use any other metrics for capacity).
