Solar power technologies harness the energy from the sun's light and converts it into electricity. Solar photovoltaic panels, (Solar PV panels), are made up of individual cells made of silicon or other special material. When the sun hits the solar panel the photons from the sunlight are absorbed by the cells, creating an electric field and causing electricity to flow.

1. Solar and battery incentives in Newark, New Jersey. What Newark lacks in sunshine, it makes up for with state and federal solar incentives. The incentives available in the Newark-Jersey City metro include: 30% federal solar tax credit; The New Jersey Successor Solar Incentive (SuSI) program; Sales and property tax exemptions for solar panels
