

Does Nauru need solar power?

“Now Nauru's power generation mainly relies on diesel. That's expensive and would pollute the environment,” said John Scott, who has been working for the project since 2022. “There is a lot of sunshine here and it's good for solar power. I believe electricity supply here will be much better when the project is completed,” Scott told Xinhua.

What does universal Kraft do?

Universal Kraft's main specialty is the development and construction of photovoltaic solar energy systems to provide clean energy and affordable solutions at a global scale. Mastering the design, development, permitting, procurement, installation, maintenance and operation of the plant, we manage every step of the project.

What type of production does universal Kraft offer?

Ground-mounted solar plants are the most common kind of production. Universal Kraft has operations along the full value chain, taking projects to “ready to build”, which are delivered under framework agreements with IPPs and EPCs, as well as co-developments with funds to take projects through own construction and operation.

Will Nauru's largest harbor be redeveloped in 2025?

On top of building the power project, China Harbour Engineering Company Ltd is also undertaking the redevelopment of Nauru's largest harbor, Aiwo Harbor. Starting in 2019, the project to be completed in 2025 includes harbor dredging and the construction of a new wharf, a desalination system and a container yard, among other facilities.

Floating solar systems are an alternative to conventional PV plants that require huge areas of land to generate commercially viable green electricity. ... Universal Kraft is one of the pioneers in the technology and has already gained knowledge in this area with ...
