

What is the installed power capacity of Liberia?

Recently, Liberia's installed electricity capacity reached ~200 MW. Most of this capacity comes from HFO and diesel power plants, with limited contributions from hydroelectric and biomass sources. Fig. 2 provides an overview of the installed capacity trend available as an alternative to the grid-based approach and the needs they meet. Fig. 2.

Does Liberia generate hydroelectric power?

Liberia generates hydroelectric power with three operational hydroelectric power plants: Harbel (Firestone) with a capacity of 4MW, Mount Coffee (LEC) with a capacity of 64MW, and a community micro hydro in Lofa County named Yandahun with a capacity of 30KW.

How can Liberia improve energy security?

One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation. By harnessing these indigenous and sustainable energy resources, Liberia can decrease its reliance on imported fuels and enhance its energy security.

How does Liberia import electricity?

3.2. Imported electricity Liberia imports electricity from neighboring Côte d'Ivoire and Guinea through the West African Power Pool (WAPP) interconnection, which involved 650 km of 225 kV transmission lines, with a transit capacity of  $\leq 290$  MW - making it the largest source of imported electricity for the country in 2020.

Who is Liberia Electricity Corporation?

Meeting the increasing demand for electric energy in Liberia and simultaneously serving as a catalyst for socio-economic development, Liberia Electricity Corporation is the shining light of the nation's energy industry.

What energy sources does Liberia use?

Liberia also utilizes other energy sources on a smaller scale. These include small-scale renewable energy systems such as solar and biomass. However, the contribution of these sources to the overall energy mix in Liberia is limited. Abundant and clean energy sources, reducing reliance on fossil fuels.
