Litherite Void Miner (Environmental Tech) Question How does this thing work? I'm so confused. I used the GUI to auto build the structure, I have 2 FE Inputs and 2 Item Outputs, both FE Inputs are powered and full of energy, I have hoppers to ...

Any combination of cells(Any tier) can be used on any Panel, meaning you could potentially use Nanorite and Xerotherm cells on a Litherite Solar Panel, or Litherite and Aethium cells on a Xerotherm Solar Panel. You are not limited to what cells you want to use in your Solar Panel. Efficiency. The main thing that is different between each tier ...

Solar Litherite Erodium Kyronite Pladium Ionite Aethium Panel Mods Frames Tier One 549 729 1,098 1,152 1,152 ... I'm one week in and I can't make even a single tier 2 solar panel with all tier 2 solar cells. That's how slow it is if you're not playing on a server where the miner works 24/7.

Solar cells are obviously the most important part of the Solar Array. Any combination of cells(Any tier) can be used on any Solar Array, meaning you could potentially use Nanorite and Xerotherm cells on a Litherite Solar Panel, or Litherite and Aethium cells on a Xerotherm Solar Panel. You are not limited to what cells you want to use in your ...

?????? (Litherite Solar Cell)??????,??????[ET]??? (Environmental Tech),???MOD??,??Minecraft(???)MOD(??)????? ...

Litherite Void Miner (Environmental Tech) Question How does this thing work? I'm so confused. I used the GUI to auto build the structure, I have 2 FE Inputs and 2 Item Outputs, both FE Inputs are powered and full of energy, I have hoppers to barrels under the Item Outputs. I'm not sure what I'm doing wrong.

EVTech Solar Array values listed on the wiki is maximum RF generation. So the 549 RF/t is if you have the thing loaded up with Kyronite cells (or better). With Litherite cells you can only generate a max of 270 RF/t. Basically you gotta use the formula listed on the wiki to find out how much you can generate with a particular controller/cell ...

How would I setup a void miner in the end, pump the materials to my base, and then use a litherite solar array to power it and pump the excess energy to my base Locked post. New comments cannot be posted.

The Piezo Modifier is a block added by Environmental Tech. It allows the Solar Array Controller to work in the rain. Tier 5 and Tier 6 solar arrays make about 3/4 of their original power due to them both having 12 piezo modifiers. Unfortunately these effects are greatly diminished on tiers with...
