

What is the MACSE auction?

The MACSE auction will provide 15-year contracts for energy storage projects whereby they will be paid annual premiums to cover operating costs in exchange for making their capacity available on the Dispatching Services Market (acronymised in Italian as MSD). It will be led by transmission system operator (TSO) Terna.

How does MACSE work?

By furnishing clear, long-term pricing signals, MACSE seeks to attract investment into the storage systems market. Under MACSE, newly constructed storage facilities will receive compensation through long-term contracts, offering a premium in EUR/MWh-years. This premium will be determined via competitive auction processes.

What is MACSE policy support?

The catalyst for this is the implementation of the new MACSE policy support mechanism, offering 15 year indexed contracts on up to 100% of asset capacity. MACSE is a game changer. 15 year contracts provide key downside risk protection for infrastructure investors.

Is MACSE a good investment?

MACSE is a game changer. 15 year contracts provide key downside risk protection for infrastructure investors. They also ensure highly bankable projects given a strong credit counterparty (the government backed system operator Terna). There have been some important updates this month that impact investors targeting MACSE support.

Crucifixion became the norm for practicing Jews, and others were burned at the stake or thrown from the city's walls--both adults and babies. Even owning the Torah was enough to merit a death sentence; the Holy book was illegal within the walls of Jerusalem, and its copies were destroyed, the owners of the book murdered.
