Sadik Llapashtica, the coordinator of the solar panel project in Tropoja, which has been in operation for several years, states that the solar energy sector has gained priority. "The solar energy market in Albania is progressing very well, especially due to the energy crisis caused by the Russia-Ukraine war.

Where are solar panels being installed in Albania?

Solar park in Karavasta, Albania. Approximately one year after the start of construction on the solar energy park in the Karavasta area, the first rows of solar panels are being installed on the barren and salty land.

Does Albania need more solar and wind energy?

The government has set a target to cover 54% of Albania's total energy needs from renewable energy sources by 2030. This will require a large number of additional solar and wind energy projects to achieve this objective. However, implementing such projects comes with a series of challenges.

Is solar a viable alternative to electricity in Albania?

A move toward more solar is partly an attempt to diversify Albania's electricity sources. In "Evaluation and integration of photovoltaic (PV) systems in Albanian energy landscape," which was recently published in Solar Compass, the scientists said that solar is an adaptable and affordable alternative, given Albania's sunny climate.
