

Monaco Knight House Battery Charging Problem solved. I have a Magnum Charger/Inverter and recently had a problem with the charger providing no current to the house batteries for charging. Finally found the problem to be a blown 300 amp fuse near the house battery connection box. The panel would show "absorb" charging but 0 amps going to the ...

My house battery voltage dropped to 12.7 and would not start my 12.5k generator unless I used the battery boost switch. I was somewhat perplexed because the previous owner had replaced the batteries in October 2021.

between the Battery Disconnect and the Battery Cut-Off (Salesman) Switch. 2. Monaco was never consistent when installing systems. Your specific coach may have different 12 Volt Distribution ...

Hello I have an 01 Monaco Signature. When I tried to turn on the lights, none of the 12 volt circuits in the house worked. The only thing that seemed to operate at all was the fantastic fan in the ... Suggest checking for good continuity across the house battery-cut-off switch in the battery bay, and take a good look at the large fuse that is ...

The house battery doesn't charge from the engine alternator. Can someone supply me with the schematic diagram for this sub-system? Thanks ... HR Ambassador an Monaco Knight are sister coaches there are more monaco wiring diagrams in file section as well member contryB shares a huge collection of diagrams and files a link is in his signature in ...

I have a 40 Monaco Windsor and need new house batteries. The batteries that are in the motor coach now are 6 volt Interstate Battery U2200s. What brand would everyone recommend for performance and reliability?

The batteries that are in now have what looks like a bulge on top where the positive an...

I have a 2009 Monaco Camelot 40 ft. I want to replace the current house batteries and have looked at many types. Lifeline has been mentioned to me as a very good battery. Also Trojan. Of course, various battery dealers advertise "deals"; if you want their batteries.

House Batteries Common Ground Typical 12 Volt Battery Isolation System - Monaco Family of Coaches Solar Distribution to Chassis Systems o Starter o Accessories o Ign o Preheat o Etc. Alternator House to Chassis Maintainer (Big Boy or ??) Battery Boost Solenoid Solar Inverter Charger House 12 V Distribution Notes 1.

Call and shop around. The Trojan T-105 might be \$5 - 510 higher than the OEM Interstate 225 that Monaco put in. There is another thread on starting batteries going. There is also a file on Battery 101. Use the .search box. Put in Battery and use Files from the drop down options. Many have found it informative as it was written for MH.

replacing battery shut-off switch in 2000 Monaco need instructions ... I will be replacing the house switch when I get the opportunity. I replaced it with a marine heavy duty switch of similar design from west marine for approx. \$30. It was over kill but I wanted to avoid any problems. The holes lined up perfectly and it was an easy swap.

RV #5 1999 Monaco Signature Slide ISM 11 450 RV #6 2005 Monaco Executive 43PBQ Detroit Series 60 Honda Fit, Odyssey or Cargo trailer in tow. ... If the generator started and ran off the chassis battery and was running the 120 volt charger, charging the house battery, it would be running down the chassis battery. That could be a big problem if ...

Should be 13.4. In the electrical bay just aft of the battery compartments there is a battery tender which I can't figure out its purpose and how it ties into the battery circuits. It shows 13.4 volts. Can you take a close up photo of your house battery hookups. They should be similar to mine. I think mine is not hooked up properly. Thanks

The inverter charges the house batteries from shore or generator power. The big boy connects the two battery banks together, (like jumper cables) when either thing is charging its batteries more than 13.4 volts. The big boy also connects the two battery banks together if you hold the boost switch.
