

Can Montserrat become a net energy exporter?

According to the Energy Task Force Report, "Montserrat has the potential to emerge as a net energy exporter through the aggressive development of its geothermal resources." A significant barrier highlighted in the 129-page document, is the lack of financing for project implementation.

What does the Montserrat Energy Department do?

To collaborate with various regional and international development partners to facilitate the implementation of Energy Efficiency, Energy Conservation and Renewable Energy programs and projects. The Montserrat Energy Department is launching the next phase of its Efficient Energy initiative by distributing 250 Plug-In Meter Readers.

What makes Montserrat a more prudent choice?

Chairman of the task force and Director of Energy for the Government of Montserrat, Kenrick Burke said, "We believe that a more prudent choice for Montserrat is an aggressive and multi-faceted strategy of diversification and development of the most feasible indigenous energy resources."

How much does electricity cost in Montserrat?

Montserrat's utility rates start at \$0.53 per kilowatt-hour (kWh) for residential customers, which is above the Caribbean regional average of \$0.33/kWh. Like many island nations, Montserrat is almost entirely dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Should Montserrat choose two energy futures?

"Montserrat must choose between two energy futures. Currently, imported fossil fuels provide 99.4 percent of Montserrat's energy needs.

How many plug-in meter readers are available in Montserrat?

The Montserrat Energy Department is launching the next phase of its Efficient Energy initiative by distributing 250 Plug-In Meter Readers. As part of a collaborative
