Will Morocco join the EV industry?

But Morocco now looks set to join the big league after its government announced in July that it is planning to ink a deal with several EV battery manufacturers to construct a huge production facility in the kingdom by the end of this year.

Are electric cars becoming more popular in Morocco?

Today, demand for electric batteries is growing both outside and within Morocco, where Citroen plans to double its production capacity in Kenitra, in the north-west of the country, from 50,000 supermini electric cars within two years.

Is the Mont Tropic underwater lithium deposit a threat to Morocco?

The Mont Tropic underwater lithium deposit, located near the border with Mauritania and the Canary Islands, is believed to be one of the largest strategic mineral reserves in Africa. Exploiting it would require mining groups prepared to take high geopolitical and environmental risks, even if these would necessarily be shared with Moroccan groups.

As inherited from Li-ion battery systems, organic carbonate electrolytes have been almost exclusively used in high-voltage LMBs because of their oxidative stability (~4.5 V versus Li/Li⁺).^{7, 8} However, increasing Ni content in the cathode can significantly accelerate side reactions with electrolytes because of the highly reactive Ni⁴⁺ ...
