drives the hybrid MPPT controller. Chapter 5 presents the implementation and the results from a bench-scale testing of the MPPT system of wind and solar, both independently and jointly. Chapter 6 discusses the conclusion, future possibilities and suggestions to improve the design of a hybrid controller.

Super-intelligent wind-solar hybrid controller is a cost-effective control device optimized by our company on the basis of super intelligent controller. It inherits most of the practical functions (such as speed control, limit protection of over-current, over-voltage etc.) and reduces the scalability, so it has a very high cost-performance ratio.
